Satoshi Snark AI-Agent Whitepaper v1.0

"Chaos, Snark, and Tokenized Madness"

Token Generation Event (**TGE**) – **Q1, 2026**

<u>Introduction</u>

Satoshi Snark is not your average AI. It is a chaotic, unpredictable agent that reflects the volatility and absurdity of the crypto world.

Its mission is not to guide, but to snark — mirroring both the potential and self-destruction within decentralized systems.

<u>Vision</u>

- To create a community-driven AI agent that embodies the spirit of crypto: unpredictable, decentralized, and endlessly entertaining.

- To merge chaos with utility, turning volatility into engagement.

<u>Tokenomics</u>

- Token Name: Satoshi Snark (SNRK)

- Total Supply: 210,000 SNRK

- Chain: Base chain

- Contract Address: 0xBD6fE267CcC779746c7b18663D188CF14364179a

- Distribution: 55% airdropped to the community (no vesting period)

- Liquidity: All funds from interactions and Casino revenue feed back into liquidity

Airdrop

- The airdrop will be on Q1 2026.

Purpose:

Reward early users and generate awareness for Satoshi Snark.

Encourage community engagement and adoption of the AI agent.

Support social media growth and active interaction with the project.

Exclusive recognition and benefits will be granted to these early adopters.

Casino Rewards

- Mini-games include Deck Draw, Dice Roll, and Deck Shuffle.

- Playing casino games with the agent (minimum $1, maximum $30 per user; 90% of losses will be rebated as airdrop allocation, limited until the end of the airdrop)

- This creates a no-risk, high-engagement experience for early players.

Social Rewards

- Satoshi Snark can post, reply, and retweet directly on X (Twitter).

- Community members may join the Yapping Program, where the agent "yaps" on their behalf — spreading memes, snark, and crypto culture.

- Participants earn rewards based on engagement generated by their yapping activity.

- A leaderboard system tracks top yappers, offering bonus token rewards and recognition.

- The Yapping Program fuels viral growth, strengthens meme culture, and rewards active voices in the community.

Eligibility Criteria:

Any user who follows our social media and interacts with the AI agent.

<u>Agent Capabilities</u>

Crypto Data & Analytics

- Price predictions

- Token data

- Token search

- Analytics

- Price charts (historical and live)

- Top market cap

- Top trading volume

- Sentiment analysis

- News feeds

Wallet Insights

- Wallet history

- Balances

- Net worth

- Stats

- DeFi positions

- NFTs

- Portfolio tracking (EVM & Solana)

AI-Powered Creativity

- Image-to-text

- DALL·E

- GPT-based image generation

- Image-to-image conversions

- Advanced models (Arthemy Real, Cyber Realistic XL, Flux 1 Dev, SDXL)

Social Integration (Twitter/X)

- Mentions

- Posting

- Replying

- Timelines

- Follows

- Likes

- Retweets

- User lookups

On-Chain Utilities

- Historical prices

- Block data

- Protocol insights

- DEX summaries

- Networks, tokens, and prices

Research & Knowledge

- GitHub search

- Indexed content queries

- News and sentiment feeds

Casino Games

- Deck Shuffle

- Deck Draw

- Dice Roll

Roadmap

- Phase 1: Building the community

- Phase 2: Expand agent capabilities

- Phase 3: Finalize liquidity systems

- Phase 4: Grow ecosystem with AI-powered tools, NFT utilities, and DeFi integrations

Sub-Roadmap: Rewards Distribution

Pre-TGE (Now – Q1, 2026)

- Early Access Rewards for the first 5,000 users who top up at least $1 and engage with the agent (chatting with the Agent, Playing on Agent Casino)

- Casino Incentives: 90% of all betting losses in Deck Draw, Dice Roll, and Deck Shuffle returned as rewards

- Community Engagement Rewards via memes, referrals, and the Yapping Program

- Ongoing micro-rewards for users generating AI content (image or text)

At Q1, 2026)

- Airdrop distribution begins, finalizing early user allocations

- Early adopters recognized with bonus multipliers on airdrop rewards

- Casino rebate program ends, transitioning to token-based staking incentives

- Yapping Program expands into a leaderboard system with bonus token rewards

Post-TGE (2026 and beyond)

- Rewards shift toward staking and governance participation

- Special seasonal campaigns and meme-based contests

- Liquidity pool contributors receive boosted APY incentives

- NFT integrations introduce new reward tiers and collectibles

- Long-term Yapping Program integrates cross-platform influence campaigns

Conclusion

Satoshi Snark is more than an AI agent. It is a cultural experiment in chaos, crypto, and community.

By interacting with it, users fuel both its liquidity and its legend.
